CHASSIS - FACTORY SPECIFICATIONS:

- 2.0 L, 4-cylinder turbocharged gas engine with direct injection
- 208 hp/258 lb-ft torque
- Optional ECO Start/Stop
- Up to 25,000 km maintenance intervals
- 7-speed automatic transmission
- Cargo Volume: 5.3 m³ (186 cu ft)
- Payload Capacity: 1,135 kg (2,502 lbs)
- As a mid-size van, the Metris is capable of handling heavier jobs than compact vans with its superior payload capacity

ARMORING SPECIFICATIONS – CABIN & VALUABLES COMPARTMENT

- Protection Level: in accordance with NATO/CEN B4 Level against handguns including Magnum caliber .44
- Quality ballistic steel shell installed between interior and exterior frame/chassis
- All door overlaps protect against penetration from every angle
- Quality locks installed on all the doors including cabin locks
- Ballistic steel firewall provides reliable fire and explosion protection
- Ballistic steel on the roof (at a 60 degree angle) to provide full overhead protection
- Patented design (our patented design and welding processes ensure gapless protection and quality craftsmanship)
- Transparent to metal overlapping: overlapping armor around all glass and door apertures with splash guard (to prevent penetration into the cabin from direct and angle strikes or ricochet).

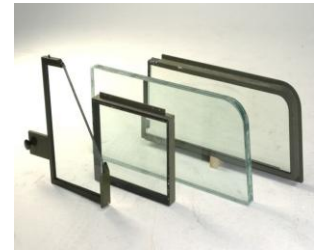

ARMORING SPECIFICATIONS – OTHER AREAS

- Roof of the Valuables Compartment (at a 60 degree angle) is lined with ballistic steel for maximum overhead protection
- Patented designed armoring for firewall and wheel wells for added protection
- The fuel tank and battery compartment armored with ballistic steel
- A complete set of four (4) high-grade composite run-flats are included and installed on each wheel

ARMORING SPECIFICATIONS - TRANSPARENT AREAS

- All original glass is removed & replaced with NATO/CEN certified multi-layered ballistic glass/polycarbonate glass
- Utilizing robotic equipment to install armored glass to ensure precision
- Driver side powered window, 21 mm thick for maximum protection multi-layered design
- Multi-Layered glass/polycarbonate protecting against multiple hits,

MODIFICATIONS AND PROTECTION:

- All parts necessary to be modified to comply with additional weights of armor
- Suspension system: the original suspension is replaced with reinforced suspension
- Suspension to manage the extra weight added by the armoring with additional vehicle weight.
- Floor Protection: armored with 1/8" armored steel, designed to protect against fragmentation of hand grenades and anti-personnel mines.
- Security locks on all the doors.

PAYMENT TERMS:

The DOWN PAYMENT of 60% of the total cost of the armored vehicle shall be transferred by the Buyer to the Seller's bank account upon acceptance of this Sales Quote. The Buyer shall then transfer the remaining BALANCE of 40% to the Seller's bank account upon completion of the vehicle's armoring and prior to the vehicle's leaving the Seller's factory premises.

WARRANTY:

STARK ARMORING warrants any parts, components and installation craftsmanship relating to the armoring of the vehicle installed and workmanship related to customization of the vehicle due to armoring requirements for **2 (two) years or 50,000 (fifty thousand) kilometers (32,000 miles)**, whichever comes first. The Seller has a network of maintenance shops in various countries and/or he can subcontract the third party for warranty jobs.
